

The Eye In the Sky

Do you find yourself wishing you were in multiple places at once? Wouldn't it be great to know that your multi-locational business is secure?

Clear2There VistaPlex video surveillance makes this possible. Through the use of multiple digital surveillance cameras, remote locations can be monitored and digitally recorded in real-time from anywhere in the world. Most importantly, the Clear2There VistaPlex is built with the scalability and flexibility to grow with your business.

After Superior's many years of designing communications systems, it has become clear that the most effective method of surveillance is an integrated Clear2There system. Clear2There implements multiple Digital Video Cameras run through a DVR server that channels video information directly through your Ethernet HUB and into your network. The real time footage that you record can be viewed from any computer in the world by simply logging into your network. This means that your company will benefit from complete security coverage as well as the reassuring knowledge that at any point remote sites can be monitored.

The Clear2There solution offers vast scalability and flexible functionality. When VistaPlex servers are networked, an unlimited number of cameras can be connected, and up to 16 cameras can be connected to a single server; best of all, the system can be maintained right from your telephone closet. Video images can be compressed to a user-definable ratio, allowing users to maximize video quality (up to 30 frames per second) or minimize file size according to their needs.

Contact Superior Communications Inc. at (800) 735-7070 or info@sciinc.net for more information or a free consultation.

Overview of key system features:

- ◆ Modified Linux Operating System
- ◆ Ultra resilient secure architecture
- ◆ No remote software required
- ◆ No licensing required
- ◆ 100% virus security
- ◆ Unlimited users viewing from remote locations
- ◆ Local and remote monitoring
- ◆ Real-time local view
- ◆ Real-time remote playback
- ◆ Secured user levels
- ◆ Pan, tilt and zoom support
- ◆ Variable image compression
- ◆ Up to 30 frames per second/per camera
- ◆ Two independent frame rate controls per camera
- ◆ Built-in motion detection zones per camera view for recording
- ◆ Triggered event browsing

The Clear2There system ranges in price depending on your coverage needs. Whatever the system size or design, Clear2There has become an invaluable component in all of our clients' security systems. Contact Superior at 1-800-735-7070 or info@sciinc.net to determine what system configuration is right for your business.
